

Valeria, Roman city

Teaching guide

AGE GROUP: 10 - 14 years old

INTRODUCTION

The development of linguistic and digital skills, learning to learn and cultural awareness and expressions is essential both in accordance with our current regulatory framework, and in the personal development of students. For this reason, we developed a work unit where we virtually bring educational resources of great cultural value to the classrooms, since our students have no possibility of access to it (due to the current pandemic situation).

The visit to the archaeological site of Valeria as a common thread of learning, incorporating new technologies and new alternative museum approaches, enriches the students' knowledge about the time of the Roman Empire in the archaeological field of the community of Castilla La Mancha.

OBJETIVES

- Learn about the way and lifestyle of the Roman Empire.
- Learning the different terms and popular places of a Roman city.
- Enjoy the pleasant visit to the ruins of the ancient Roman city.
- Enhancement of the cultural, monumental and natural heritage.
- Development of the sense of protection and conservation of the BIC contemplated by the Law of Historical Heritage of Castilla La Mancha.

PROFICIENCIES

- Linguistics.
- Digital.
- Learn to learn.
- Cultural awareness and expression
